AN INTERCALARY EVALUATION OF A BLENDED LEARN POST-GRADUATION EXPERIENCE IN A MULTI-CONTINENTAL CONTEXT

Luis Amaral[1]

Abstract *— The purpose of the Post-graduate Systems Development in Cape Verde and East Timor project (PostCaVET) is to strengthen the overall educational offerings of the Universities of Cape Verde (UniCV) and Timor Lorosa'e (UNTL) through the development of their post-graduate (PG) systems by the implementation of PG management quality assurance guidelines and regulations, the supporting information and communication technology (ICT) system, human resources and pedagogic and scientific resources. After 18 months from the beginning, it's time to draw the first conclusions about the use of ICT in this context so unusual and heterogeneous. The intention of this paper is to expose and discuss these initial findings in order to be able to make the necessary adjustments to the project to maximize its success.*
